

Plate 1: Top: *Acarospora smaragdula* (x3), in copper run off from gravestone showing two forms - yellow-green due to uptake of copper salts and pale brown with dark apothecia without obvious copper uptake; Bottom: *Teloschistes flavicans* (x0.6). (Photos: Ann Allen). This accompanies the paper by James, Allen and Hilton.

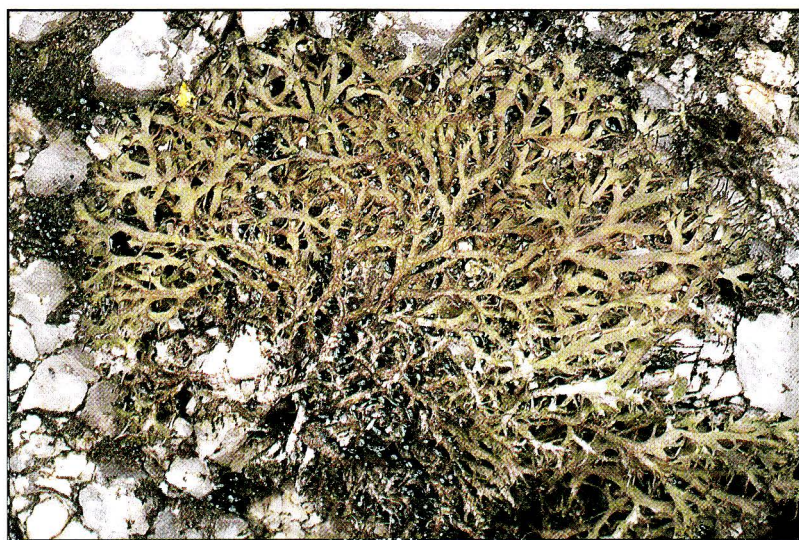

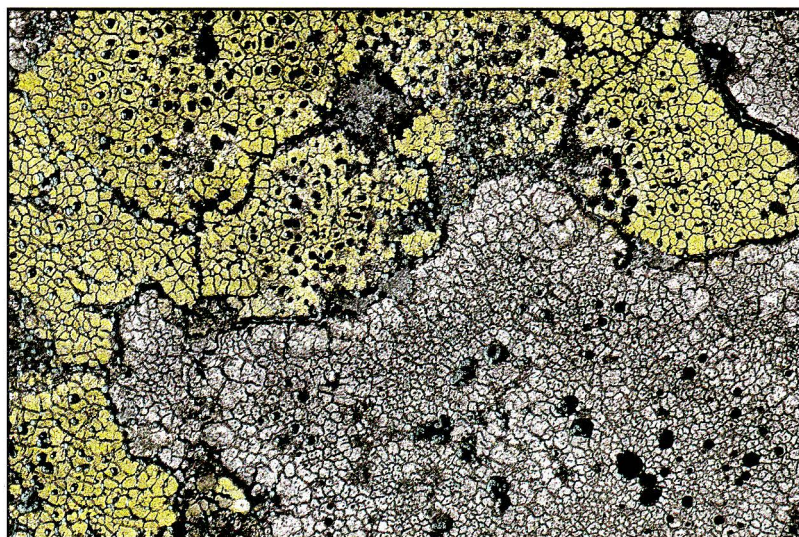

Plate 2: Top: *Rhizocarpon geographicum* (yellow) with *Buellia subdisciformis* (grey) (x0.6); Bottom: *Anaptychia ciliaris* subsp. *mamillata* (x0.6) (Photos: Ann Allen). This accompanies the paper by James, Allen and Hilton.
